Risk and reward profile

Source: Key Investor Information Document as at 30/07/2020

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.

The fund has been classed as 5 because its volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund

The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
