Investment Objective

To achieve a total return (the combination of income and capital growth), over any five year period, after all costs and charges have been taken.

Capital invested is at risk and there is no guarantee the objective will be achieved over any time period.

Comparator Benchmark

IA Mixed Investment 40-85% Shares sector

The fund's performance may be compared against the Investment Association Mixed 40-85% Shares sector. Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers). The comparator benchmark has been selected as we consider it assists investors in evaluating the fund's performance against the performance of other funds invested in similar assets.

Risk and reward profile

Source: Key Investor Information Document as at 30/07/2020

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.

The fund has been classed as 5 because its volatility has been measured as above average.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.

The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
